Dear  
colleagues,

It will be a pleasure to welcome you to our 12<sup>th</sup> International Workshop on Phonosurgery & Functional Laryngology in Würzburg. This workshop is dedicated to cover a wide range of topics starting from basic approaches and reaching up to highly specific applications in laryngology. Lectures and live surgeries in 3D HD from the operating theatre will be the basis for critical discussions. Hands on training in microphonosurgical skills, electrophysiology and office based laryngoscopic procedures will be provided.

Our 2018 workshop will cover fundamentals, such as medializing and narrowing procedures, microflaps, and voice gender reassignment procedures. Additionally, the meeting will focus on pros and cons of office based surgery, state of the art imaging of the larynx, science in voice restoration after laryngectomy, and laryngeal reconstructions including free flaps. Finally, an update on laryngeal pacemaking will be given. The faculty consists of invited international experts and our local group.

The additional Satellite Symposium on Imaging in Dysphagia Diagnostics will include introductory lectures and a hands on training.

The 12<sup>th</sup> International Workshop on Phonosurgery & Functional Laryngology in Würzburg is patronized by the European Laryngological Society, the European Research Group on Functional Laryngology, and the World Voice Consortium.

We are looking forward to a personally and scientifically enriching workshop.

Norbert Kleinsasser  
Head of Clinical and  
Experimental Laryngology

Wafaa Shehata-Dieler  
Head of Phoniatrics

Rudolf Hagen  
Chairman of the  
Department
